Object : Certificate of Compliance - Substances that Deplete the Ozone Layer for Power System Technology products

The Montreal Protocol is an international treaty designed to protect the ozone layer by phasing out the products of a number of substances believed to be responsible for the ozone depletion.

Power System Technology's deliverable products do not contain ozone depleting substances that are subject to the Montreal Protocol on Substances that Deplete the Ozone Layer and U.S. Clean Air Act, Title VI Regulations.

Ozone Depleting Substances include CFCs, Halons, HCFCs, Carbon Tetrachloride, Hydrochlorofluorocarbons, Hydrobromofluorocarbons, Trichloroethane (Methyl chloroform), Methyl bromide, Bromochloromethane.

Further information on the Montreal Protocol regulation on substances that deplete the ozone layer is available here:
